### **Lutze takes over Dansk Grusgrav Material ApS., DGM**

The Lutze Group is taking over the activities of Dansk Grusgrav Material ApS., DGM, in Vemmelev / Denmark, with effect from Oct.15.

DGM, authorized Metso dealer for Denmark, Faroe Island, Greenland has been offering machines, complete systems and services for the stone and gravel industry, contractors, the mining industry, mineral processing and the concrete and asphalt industry for 50 years now.

The Lutze Group is with this strengthening its presence in the “crushing and screening” industry in Scandinavia and further expanding its footprint in the Lutze core countries. This increasingly strengthens the focus on the entire process of raw material extraction.
